Aishwary Saxena

AI / Backend Systems Engineer
Noida, India | +91 7223904704 | Aishwarysaxena2006@gmail.com
LinkedIn | GitHub | LeetCode | Portfolio

Summary

AI Engineer with hands-on experience building autonomous agentic systems, LLM-integrated backends, and retrieval-augmented pipelines. Currently building full-stack AI features at LearnWithAI, alongside independent projects spanning MCP-based agent orchestration, RAG-driven security detection, and cyber-defence. Comfortable across Python/FastAPI, LLM integration (OpenAI, Gemini, Groq, HuggingFace), and React – with 300+ LeetCode problems solved.

Education

GL Bajaj College of Technology & Management 2023 – Present
Bachelor of Technology in Computer Science, Greater Noida

Lucknow Public School (CBSE) 2022 – 2023
Senior Secondary Education, Lucknow

Experience

LearnWithAI Aug 2026 – Present
Full Stack AI Engineer Intern

Skills

Languages: Python, C++, JavaScript, Go, English (Professional), French (Learning)
Web & Backend: FastAPI, Flask, ReactJS, HTML, CSS, RESTful API Design, API Integration & Documentation
Databases: PostgreSQL, SQL, ChromaDB (Vector DB), Neo4j, NoSQL Concepts
DevOps: Git, GitHub, Docker, CI/CD, Netlify, Render, Vercel
Core CS: Data Structures & Algorithms, OOP, Recursion, Dynamic Programming
AI/ML & LLM APIs: RAG, Sentence Transformers, LLM Integration & Evaluation, Multi-Agent Systems, Guardrails, OpenAI, Gemini, Groq, LangChain, LangGraph, HuggingFace
Tools & Platforms: Model Context Protocol (MCP), ChromaDB, Kafka, Debugging, Postman, n8n, Specmatic

Projects

CLARA — Contextual Learning and Autonomous Response Assistant *Python, FastAPI, MCP, HuggingFace API, Groq API, OAuth 2.0, React*

- **MCP-based agent** routing 9 natural-language intents to 9 tool actions across 2 live **OAuth 2.0** integrations (Google Calendar CRUD, Gmail send/read/reply)
- **Speech-to-text** pipeline enabling fully voice-driven, hands-free command execution
- **HuggingFace LLM**-powered autonomous execution (e.g., *"Schedule a meeting at 2 PM"*) with zero manual input; **Groq-hosted LLM** fallback for out-of-scope queries
- Modular **MCP architecture** with **Specmatic**-based contract testing in Dockerized **GitHub Actions** CI

SentinelAI — Autonomous Multi-Agent Cyber Defence Platform *Python, FastAPI, LangGraph, Kafka, PostgreSQL, OpenSearch, Qdrant, Neo4j*

- Event-driven SOC pipeline (**Kafka** pub/sub) spanning Log Collection, Enrichment, Threat Intelligence, Detection, **MITRE ATT&CK** mapping, and Policy-gated Response
- Provider-registry **Threat Intelligence Agent** integrating **VirusTotal**, **AbuseIPDB**, **OTX**, plus **JWT auth** and **RBAC** – backed by 900+ passing tests
- Provenance-tagged evidence model across a polyglot data layer (**Postgres**, **OpenSearch**, **Qdrant**, **Neo4j**); **LangGraph**-orchestrated, human-in-the-loop policy gating

Detection-as-Code Security Lab *Python, RAG, ChromaDB, Sentence Transformers, HuggingFace*

- **Detection engine** – 13 YAML rules (242 patterns), 8+ attack classes, 100% detection, zero false positives, under 200ms
- **RAG pipeline** (**Sentence Transformers** + **ChromaDB**) auto-generating plain-English alert explanations
- Interactive **CLI** with *explain/chat* modes powered by **HuggingFace LLMs** for threat investigation

LinkedIn API Scraper *Python, REST APIs, API Reverse Engineering*

- **API reverse engineering** of LinkedIn's internal request flows; built a **NodeJS-based scraper** to automate data extraction and processing

Certifications

Cisco Networking Academy: CCNA, Intro to Networks & Cybersecurity, Python Essentials
Palo Alto Networks Cybersecurity Academy: Network & Cloud Security, Security Operations, Cloud Security Automation
Red Hat: Linux Fundamentals (RH104), System Administration I & II (RH124, RH134)
